**Subject:** new slide

If you've been working on the deck, all I changed was to make a new slide 10 on climate impacts, and move the old slide 10 (orange chart) to the appendix, since it doesn't have LPG in it. I had that Grieshop article but had forgotten about it. Alex wrote to remind me. Jim may have a better slide to use. We should also get his input on the WHO IAQ guidelines and anything else really. Are you reaching out to him? If not, I will.
